EXAMINER

GILMAN, ALEXANDER

ART UNIT

PAPER NUMBER

2833

DATE MAILED: 03/10/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	10/821,217	HOPPER, TROY K.	
	Examiner	Art Unit	
	Alexander D. Gilman	2833	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 April 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-7 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3, 5-7 is/are rejected.
- 7) ☒ Claim(s) 5 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Chamberland et al.

With regard to claim 1, Chamberland et al (US 4,690,482) disclose a seal fitting comprising:

a shell (26) ;

means (34, 36) retained to said shell for clamping a lead wire;

a ceramic disk (30) retained in said shell in spaced relationship to sensor

wire clamping means;

a male conductive pin (28); .

a sleeve (the forward portion of 26 with holes 26a) engaged to said shell with the ceramic disk interposed between said sleeve and said wire clamping means;

a female conductive pin (42) extending through said sleeve and into electrical contact with said male conductive pin when said sleeve is engaged to said shell;

and

means (34, 36) in electrical contact with said female conductive pin for clamping a lead wire.

With regard to claim 6, Chamberland et al disclose (Fig. 8) a body (52) for engaging the bulkhead, said shell being provided with a groove (56) for receiving an O-ring therein for sealing against said body.

With regard to claim 6, Chamberland et al disclose (Fig. 1) that said ceramic disk and said wire clamping means are located at opposite ends of said shell.

Art Unit: 2833

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 3, 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chamberland et al in view of Gribble et al .

With regard to claims 2, 3, Chamberland et al do not disclose the wire clamping means comprising a clamping tab biased away from a receptacle for receiving the lead wire and a cap screw for tightening said clamping tab against the lead wire when the lead wire is received within the receptacle. Gribble (US 3,015,084) disclose the wire clamping means comprising a clamping tab biased away from a receptacle for receiving the lead wire and a cap screw for tightening said clamping tab against the lead wire when the lead wire is received within the receptacle. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the Chamberland device with the structure, as taught by Gribble, to to replace the non-separable (soldering) connection of the wire with with the dependable easily removable connection. With regard to claim 5, Chamberland et al when modified disclose (Gribble) that the clamping tab (24) is provided with a prong (22) extending into the receptacle for receiving the wire

.Allowable Subject Matter

Claim 4 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. No prior art has been found to anticipate or render obvious the presently claimed subject matter. Specifically, none of the prior art of record discloses the combination of the limitations presented including the spring being confined by a threaded tab, said cap screw being threaded through said threaded tab.
